KNOWAGE

Release name: KNOWAGE 6.2.1

From the previous version 6.2.0 the following changes have been made:

- Document Browser: improve IE 11 compatibility using a different document list

- Bux Fixing: the following issues of Knowage tracker are now solved:
    - Import / Export, issues about export/import documents
        Import/Export Cockpit: involved documents are lost
        Import/Export Document: exported snapshot are lost
        Import/Export KPI: can not export KPIs
        Import/Export: menus are not imported
        Import/Export: Analytical Driver
        Import/Export: business model (import/Export)

    - Cockpit/Chart
        Chart: problems over label alignment
        Chart drill: drill stops working after changes on categories
        Data set is missing opening already created chart widgets
        List of document's parameters used inside a cockpit are not updated correctly
        Line chart: lines are not shown when values don't cover all x axis categories
        Cockpit: wrong default values setting the selector widget
        Aggregation using Number doesn't work on html cockpit
        Cockpit clone options are not working correctly: old values are shown.
        Widget table: number format is missing

    - Knowage Core
        Copy Link: direct link does not land into required document after authentication
        Copy Link: direct link to document execution requires authentication even if document is publicly executable
        Tester user menu and functionalities
        Role TEST doesn't show Document Browser functionality
        Saved parameters toolbar, IE layout problem
        Cannot preview dataset as admin in case it is using a multischema datasource
        Cross Navigation - Navigation name too long
        Qbe dataset with multischema datasource is cached and shared by users with different schemas
        Cockpit document that is using dataset with multischema datasource does not show any data
        Impossible to define a query dataset that uses a multischema datasource.
        Unable to paginate data from Vertica database
